PARENT GUIDE - Activity 3

LOOKING FOR LANDMARKS TO FIND YOUR WAY

-- using your Eyes

Discuss with your children the following:

- Landmarks are buildings and things in your city that do not move. They are helpful to children so they can find their way through their neighborhood.
- Noticing landmarks such as schools, hospitals, police or fire stations, parks, restaurants, markets will assist students in building a “mental map” of their location so they can always find their way back.

Questions to ask your children:

- What is a landmark? (buildings, things that don't move)
- Why are they important to notice? (help find your way back)
- What landmarks do you pass on the way to school?
- Why is it important to know the sequence of the landmarks as you pass them? (find your way back to where you started).
- Is a school a landmark? Is a bird a landmark? Why? (No. it moves) Is a gas station a landmark? Is a car a landmark (No. it moves)?
- What sense do you use to see the landmarks? (eyes)
